Motivated Full Stack Developer seeking an entry-level role to build scalable web applications using Python, Java, Spring Boot, Django, and React, while contributing to high-quality software development and continuous learning.

Skills:

Programming Languages: Python, Java, C, JavaScript, SQL
Backend: Django, Spring boot, Django REST Framework, REST APIs
Frontend: ReactJS, HTML, CSS, JavaScript, TailwindCSS, Bootstrap
Databases: MySQL, SQL

Education:

BE in Computer Science & Engineering (2021 - 2025) **CGPA: 8.24/10**
Moodlakatte Institute of Technology, Kundapura

Certifications:

Certified in Full Stack Development – Global Quest Technology
Certified in Java & GitHub Workflow – Techshreshta Solutions LLP
Certified in Microsoft Excel & UI Automation – UiPath

Internship Experience:

Full Stack Developer Intern at **Global Quest Technology, Bengaluru** Feb to Jun 2025

- Developed & maintained web applications using Python, Django, HTML, CSS, and JavaScript.
- Built & integrated RESTful APIs with Django for seamless client–server communication.
- Designed responsive user interfaces, ensuring cross-browser compatibility and better user experience.
- Implemented user authentication & DB models with Django ORM to manage application data securely.

GitHub and Java Intern at **Techshreshta Solutions LLP**

- Collaborated on Java based backend development projects utilizing Git and GitHub for version control, code reviews, and continuous integration workflows.
- Contributed to open-source repositories and internal tools, writing clean, modular Java code & resolving issues through pull requests and bug tracking.

Project Work:

Kidney stone diagnosis using Deep Learning (2025): GitHub Link

- Built CNN–SVM hybrid model (Keras/TensorFlow, scikit-learn) for kidney stone detection.
- Applied HOG features and image preprocessing for SVM.
- Created a Tkinter GUI for dataset selection and image testing.

Hotel Management System (2024): GitHub Link

- Built Python/Django based hotel management system with React frontend & REST APIs.
- Designed responsive UI using React, HTML, CSS, and Bootstrap.
- Implemented role-based access via Django auth & permissions, automated bookings & billing workflow.
